

Intermediate Microeconomics (Fall 2023)
Lecture 10
Pareto Efficiency

Part I

Pareto Efficiency (also called Economic Efficiency) – One useful _____
 for _____ the _____ of
 _____.

- **Pareto Improvement** – A way to _____
 _____.
- **Pareto Inefficient** – An _____ that _____
 a _____.
- **Pareto Efficient** – An _____ that

 are _____.

Example 1

Suppose that renters are assigned to the inner- and outer-ring apartments randomly, but then are allowed to sublet their apartments to each other. Some people who really want to live close in might, through bad luck, end up with an outer-ring apartment. But then they could sublet an inner-ring apartment from someone who is assigned to such an apartment but who does not value it as highly as the other person.

For example, suppose that Person A is assigned an apartment in the inner-ring that he feels is worth \$200, and that there is Person B in the outer-ring who would be willing to pay \$300 for A's apartment. Then there is a _____ if these two agents
 _____ and arrange a
 _____ from _____ to _____
 of some amount of money _____.

If _____ the voluntary trades are carried out, the allocation is
 _____ – people who are willing to pay the
 _____ for the apartments _____ them.

Part II

Pareto Efficient Allocation – There is _____ to make _____ the people involved _____; or there is _____ to make _____ individual _____ making _____.

- **Setting up**

- _____: _____ and _____
- _____: _____ and _____
- Person _____'s consumption bundle: _____
- Person _____'s consumption bundle: _____
- _____: A _____ of consumption bundles, _____ and _____
- _____ allocation: The _____ amount of _____ is _____ to the _____ amount _____
- _____ allocation: A _____ allocation that the consumers _____, _____ and _____
- ⇒ The amount of _____ that consumers _____ to the _____
- ⇒
- _____ allocation: A _____ allocation that the consumers _____ with _____ some of the goods with each other

- **Edgeworth Box** – The _____ of the box measures the _____ of _____ in the economy and the _____ measures the _____ of _____. _____'s consumption choices are measured from the _____ corner while _____'s choices are measured from the _____. _____'s _____ are in the _____, but _____'s _____ are _____.

○ _____:

- _____, _____: The _____ of Person _____ and Person _____ that _____
- The _____: Person _____ and Person _____ are _____
- _____: An allocation _____ the _____
- From _____ to _____: _____
 - ❖ Person _____ units of Good _____
_____ units of Good _____
 - ❖ Person _____ units of Good _____
_____ units of Good _____
- _____
as long as there are _____ that _____
and _____ a lens-shaped region

○ _____:

- _____: _____ is _____ his
_____,
the _____ of the _____
⇒ _____ that makes
_____ necessarily
makes the _____
- At _____, consumers have the _____

- **Contract Curve** – The line _____
_____ in the _____.

- **Market Equilibrium** – A set of _____ such that
 _____ the
 _____, and
 _____ are _____
 in the sense that _____
 in _____: _____.

- _____ for _____:

 - _____ of Each Person's _____ = _____
 - The _____ of each person is the _____ of _____:

 - At _____:

- ⇒ The _____ of a _____
 that a _____ to _____
 must be _____ to the _____
 that the _____
 to _____

Example 2: Shadow price

Meanwhile, at the _____

⇒ The _____ in the _____

⇒ The _____ of the Lagrange multipliers at the _____

_____ are _____

⇒ Shadow Price – The _____

to an _____ or _____

which _____

from which to _____ a _____.

⇒ Shadow price puts a _____ on the _____

⇒ A measure of the _____

of _____ the _____
